

Conference
“Graubünden forscht”
November 6-7, 2026

Call for Papers

1. The conference

[Academia Raetica](#) is the association dedicated to promoting science, research, and education in the canton of Graubünden and the surrounding regions.

On November 6 and 7, 2026, Academia Raetica will host the conference “Graubünden forscht” at the Congress Center Davos for the tenth time. The conference offers early-career researchers a unique platform to present their work, exchange ideas across disciplines, and become part of a vibrant research community rooted in Graubünden and the Alpine region.

“Graubünden forscht” particularly invites PhD candidates, postdoctoral researchers, and Master’s students to submit abstracts for oral presentations. Contributions are welcome if the research was

conducted in Graubünden, addresses topics related to the region or engages with questions relevant to the Alpine context. Submissions from early-career researchers at universities in neighboring regions are also encouraged, provided there is a clear thematic link to Graubünden or the Alps.

With its strong transdisciplinary focus, the conference encourages young researchers to look beyond disciplinary boundaries, explore new perspectives, and engage in dialogue with scholars from other fields. At the same time, it provides an opportunity to present research to a broader audience, gain visibility beyond one’s own discipline, and receive feedback from both academic peers and interested members of the public.

Conference website: www.gr-forscht.ch

2. Call for papers

We welcome abstract submissions from early-career researchers, including PhD candidates, Master’s students, junior project managers and postdoctoral researchers (up to one year after completion of their first postdoc), in Graubünden or who work on topics related to the region. Early-career researchers from neighboring regions or countries can also apply, provided their research has a clear relevance to Graubünden or the Alpine region.

If accepted, contributors will have 10 minutes to present their research, followed by 5 minutes for discussion, offering valuable opportunities for feedback and exchange.

Abstracts are welcome from all academic disciplines, including, but not limited to, natural sciences, medical and life sciences, economics, engineering sciences, the humanities, and social sciences.

We offer some financial support for travel expenses to researchers who have a longer journey to Davos. If you are interested, please contact Daniela (daniela.heinen@academiaractica.ch) by email for further information.

To give special emphasis to transdisciplinary projects, we will offer 30-minute presentation slots that allow research teams to present and reflect in depth on their transdisciplinary collaboration. We require that these sessions be presented by at least two team members, each contributing perspectives from different aspects of the project. When submitting your abstract, please indicate if you are applying for a transdisciplinary team slot and name the collaborating researchers in the comments section.

3. Your abstract

Please download the abstract template here: https://academiaractica.ch/assets/gr-forscht_2026/abstract_template_grforsch_2026.dotx. If you have issues with the download, please contact Daniela.

Key specifications:

- Submit your abstract in English (German as an exception upon request)
- Title: maximum 100 characters (including spaces), written for a general adult audience
- Abstract: 400-600 words, without authors and affiliations
- Use “**Arial**” for all text including headings. Left align all text, images, and tables.
- 11-point font size with single line spacing.
- Do not indent the first line of a paragraph.
- Margins should be set at 2.5 cm all round.

To submit and upload your abstract please go to <https://gr-forscht.ch/en/abstract-upload> and complete the registration. You will receive an automated email to confirm your abstract submission.

A scientific jury will review all abstracts regarding:

- Scientific output of the paper (further development of a methodological approach; scientific gain of knowledge based on the results obtained; innovative potential; approaches to solving everyday problems)
- Comprehensibility of the article (title states what it is about; comprehensible structure; clear presentation of the method; meaningful derivations; clean argumentation and discussion)
- Methodology (scientific quality of the methodological approach)
- Social relevance

4. Your presentation and audience

The presentation language is English. On Saturday, we will also offer selected talks in German for a general audience. When submitting your abstract, please indicate whether you would be happy to present in German as well. Please keep in mind that you will be presenting to a largely non-specialist audience. This is a wonderful opportunity to make your research visible beyond your own field. We therefore encourage you to present your work in a clear, engaging, and illustrative way. Use examples, stories, or analogies, and imagine explaining your research to a family member or neighbor with little or no prior background in your topic. You should explain technical terms in simple language or avoid them where possible.

While the abstract itself may be more scientific, you should choose the title from the outset to be accessible and appealing to a broad audience—it is often the first point of contact with your work.

Audience feedback, together with the reviewers’ evaluation, will count towards the overall assessment of the presentations. Outstanding contributions will be awarded with a cash prize.

Academia Raetica is offering two workshops in connection with “Graubünden forscht”:

[Stay in Mind! Crafting Memorable Scientific Presentations](#), Davos

[Filmmaking for scientists](#), Davos

As a participant in either course, you benefit from a **10% reduction** on the conference fee.

5. Deadlines & fees

Abstract submission and acceptance

- **May 25, 2026: Abstract submission** for all abstracts and transdisciplinary projects
- **NEW: June 30** -> Extended Deadline for abstract submission
- **By August 13, 2026: Notification of abstract** acceptance, if you submitted your abstract by May 25. We will try our best to have late submission (May 26–June 30) reviewed before August 25.

Conference fee for contributors:

	Early bird (registration by August 25)	Regular (registration from August 26)
Master students	CHF 100	CHF 150
PhD students	CHF 150	CHF 200
Postdocs, scientific staff	CHF 180	CHF 230

The fee includes **all conference activities including coffee breaks, lunches, and the conference dinner**. Information on visitors' access will be published separately.

6. Preliminary program

Time	Friday, November 6, 2026
08:00–09:30	Registration and “Znüni”
09:30–10:00	Welcome and opening
10:00–10:30	Presentation transdisciplinary project
10:30–10:45	Break
10:45–12:00	Parallel session 1
	Parallel session 2
12:00–13:15	Lunch
13:15–14:30	Parallel session 3
	Parallel session 4
14:30–14:45	Break
14:45–15:15	Presentation transdisciplinary project
15:15–15:30	Break
15:30–16:45	Parallel session 5
	Parallel session 6
17:00–19:00	Social activity with apéro
from 19:30	Conference dinner

Time	Saturday, November 7, 2026	
09:00–09:30	Znüni	
09:30–09:45	Welcome and opening	
09:45–10:15	Presentation transdisciplinary project	
10:15–10:30	Break	
10:30–11:45	Parallel session 7	Parallel session 8
12:00–14:00	“Mittag der Forschung” (Public science fair) with vernissage book «20 Years Academia Raetica»	
14:00–15:15	Parallel session 9	Parallel session 10
15:15–15:30	Break	
15:30–16:15	Keynote	
16:15–17:30	Conference awards for the best presentations, followed by an apéro	

7. Contact

We look forward to hearing from you and are happy to answer any questions you may have about the 10th Conference “Graubünden forscht”. Please contact:
